

VERNE BINTZ COMPANY

2017 FALL/WINTER

INDEX-AT-A-GLANCE

Dear Customer,

We appreciate your business!

For over forty years our goal has been to offer you, the Foot Care Specialist, a variety of fine quality products and efficient service.

To the many faithful customers we now serve we want to say "Thanks." To those of you who have not used our products—we welcome your business.

Please call.

Sincerely,

Verne Bintz

Comfo-Arch

A molded featherweight arch. Excellent for sport, work and casual shoes. Deep heel cup for great hind foot control. Easily posted and adjusted. All that is needed to modify the Comfo-Arch is a pair of scissors and sandpaper for adjustments to the length some patients need.

A great solution for HMO restrictions, non-insurance and hardship cases! Don't let the price fool you, it's a winner!

#16-250 ¾ Length Sz. XS-XL

"The Verne Bintz Company has been a life-saver for my patients. After having spent hundreds of dollars per pair, my patients find more comfortable support at a fraction of the price. Thank you so much, Verne Bintz, for remembering the working class." —C. Bret Whittaker DC, D.A.B.C.O.

Bintz

Comfo-Lite

The Comfo-Lite is a semi-rigid 3/8" 6# silver grey foam with blue cover. It is very good for use with dress shoes, sneakers or when minimal displacement is a factor. It is a very foot friendly orthotic.

#24-150 ¾ Length Sz. S-XL

"My patients experience immediate and significant relief from plantar fasciitis when I utilize the Comfo-Lite devices. I not only use them as temporary devices but also for long term relief for those patients without orthotic coverage through their insurance."—Lori Knutstrom, DPM

Carbon Fiber Spring Plates

Light as a feather, stronger than steel. These plates store energy at toe off and return it into the swing phase of gait for a more natural walk. Designed to fit depth-style footwear and are contoured to fit at the heel and toe. The contoured plates will not rock or break. Available in 13 sizes which means a more precise fit which is a definite plus. **Specify Left or Right.**

Carbon/Graphite with Glass Webbing

A combination of glass webbing and carbon webbing is combined with an acrylic-polymer which allows the material to maintain its density and integrity.

- Material can be reheated and reshaped as often as desired
- No special band saw blades needed
- No fraying of the edges—smooth finish
- Easily adjusted with a heat gun at 244-266°F
- Reheatable and remoldable

ProThotics™ Comfort and Comfort Gel—Dual Density—Medicare Approved

Constructed with a multi-density material combination of Plastazote and polyurethane, these orthotics offer superb resilience, cushioning, and shock absorption. Plastazote's distinctive self contouring capabilities and hypoallergenic, anti-microbial formulation enable it to conform to the shape of the foot and evenly distribute pressure across the surface of the foot. Designed to fit into both traditional footwear and "additional depth" orthopedic shoes. Heat moldable 280-300°F. Urethane base durometer shore A40. 1/8" Pink Plastazote + 3/16" Urethane. Size chart below.

BIRKENSTOCK®

Made in Germany • Tradition since 1774

THE BLUE FOOTBED can make the best sports shoe even better. Made of durable ground cork, with a nylon-type filler for flexibility, the Blue Footbed is shaped like the imprint of a healthy foot. It cradles and cushions your heel, providing a “shock absorber” to help ease the pressure of heel strike.

Blue Footbed Arch Support for Casual Shoes

"Casual" footbeds are designed for shoes with minimal or no heels. They are ideal for athletic and flat casual shoes. High flanges keep the feet from rolling inside the shoes, and deep heel cups absorb shock.

Cork—A Natural Resource

Cork is a natural resource with ideal properties. It is lightweight, flexible, absorbs minimal amounts of water and has an antibacterial quality. It takes only a decade for the cork oak tree to develop a layer of usable cork. The cork bark is carefully removed so the tree trunk won't be damaged. It takes 30 to 40 years for a tree to yield its first harvest. The bark is stored outside for about 1-2 years, then it is boiled in water and cut into strips, ground and sifted into different size granules. Depending upon the use, granules are sorted by 3-4 weight classes.

BirkoBalance—Cork Shell—High Flange

This shell can be used to help problems such as fallen arches and excessive pronation. The high flanges support the cuboid area and provide stability.

#5-1001190/15501 Unlined/Wide Sz. 35-47

The 10 Seconds® Flat Foot® Sport & Low Profile

The problems associated with overpronation are prevented by the Flat Foot® Insole. The insole's patented design aligns the ankle and supports the foot from mid-stance to toe-off.

- **Patented Cushioning**—Heel to toe pronation control
- **Pain Relief**—Compensates for biomechanical problems associated with flat feet
- **Anti-Blister Top**—Keeps feet cooler, drier, and less prone to blisters

Flat Foot® Sport

Relieves pain caused by biomechanical problems associated with flat feet — foot, ankle, hip, lower back, leg, and arch pain.

- Poron® cushioning provides maximum cushioning for athletic use.
- Anti-blister top cover: By controlling the amount the foot slides across the insole's surface, the anti-friction top cover helps prevent blisters and keep the feet cooler and drier.
- Fights odors: Biostatic™ antimicrobial top cover protects against odor causing bacteria and other microbes.

#17-101

Sz. M4-14, W5.5-12.5

Flat Foot® Low Profile

Same patented design as the Flat Foot Sport without the Poron® layer. Low profile design fits dress, cleat, and casual shoes.

All New Balance insoles are PVC and latex free!

New Balance Pressure Relief with Met

The Pressure Relief insole with metatarsal support is designed to reduce friction within shoes and keep feet blister-free, while redistributing pressure throughout the foot.

#17-3030 M4-16, W5.5-12.5

Pressure Relief with Met—Wide

#17-3030WD M9-16, W10.5-12.5

New Balance Stability

The Stability insole provides rigid support designed to address true arch problems. Constructed with flexible arches in mind, it remains a popular, effective option providing superior arch support and cushioning.

#17-3720 M4-16, W5.5-12.5

New Balance Motion Control

The Motion Control insole provides extra shock absorption and cushioning. It is highly versatile and ideal for a wide variety of foot types, including those with high arches or rigid arches.

#17-3210 M4-14, W5.5-12.5

New Balance Supportive Cushioning

Constructed with flexible arches in mind, the Supportive Cushioning insole provides separate heel and forefoot cushioning to address true arch problems. Carbon graphite arch support.

Pedag Holiday—It's Back!

All of the great qualities of the Viva Mini in the vintage Holiday shape!

#50-179-47	Tan	Sz. 35-48
#50-287-947	Black	Sz. 35-46

Pedag Viva Mini

A wonderful and economical solution for dress shoes!

- $\frac{3}{4}$ orthotic with a semi-rigid, heat moldable polypropylene longitudinal arch support
- Softer pad supports the latitudinal arch (metatarsal)
- A heel cushion relieves pressure and impact on the heel
- Orthopedic design helps prevent and relieve flattening and pronation by helping the foot regain an anatomically correct position
- Recommended for those who suffer from plantar fasciitis and metatarsalgia
- Very thin and ultra light—thin enough to fit in almost any shoe
- Made of vegetable tanned leather which allows the foot to breathe and absorbs moisture

#50-179-92	Tan	Sz. 35-48
#50-287-911	Black	Sz. 35-46

Pedag Viva

The Pedag Viva is a full length version of the Viva Mini. Perfect support for oxfords and dress shoes with purifying active carbon filter to help prevent foot odor. The Viva can be adjusted with a heat gun or easily posted.

#50-187	Sz. 35-48
---------	-----------

Pedag Relax

The Pedag Relax can be used with any sport or casual shoe. The $\frac{3}{4}$ length gives metatarsal support, arch support and heel cupping for a triple comfort effect, but leaves plenty of forefoot room. Leather cover.

#50-127	Sz. 36-46
---------	-----------

Pedag Viva Sport

The Pedag Viva Sport is a semi-rigid, polypropylene footbed that supports the longitudinal arch and the plantar fascia. Anatomically positioned pad maintains the metatarsal arch. Heel cushion adds to the shock absorbing properties. Innovative material offers high shock elasticity for impact activities. Extremely tough and hardwearing. Great for diabetic and sensitive feet. The orthotic is the same as the Viva Mini insole.

#50-181

Sz. 36-46

Pedag Soft

The Pedag Soft is a latex foam pad which softens steps. The Soft can also be used to make shoes more snug to improve fit. Perfumed. Adult sizes are solid yellow latex with black cover.

#50-104

Sz. 35-48

Pedag Comfort

The Pedag Comfort is a $\frac{3}{4}$ length insert made of vegetable tanned leather specifically designed for severely spreadfeet. The T-Form metatarsal pad prevents and alleviates symptoms of spreadfoot. Extra soft heel padding for more comfort. Ideal to wear in any flat shoes or pumps.

#50-142

Sz. 36-46

Pedag Lady

These soft, genuine leather insoles provide relief and protection for ball of foot discomfort. They help protect sensitive areas of the foot and prevent callus buildup. The $\frac{3}{4}$ design allows freedom for the toes. Self stick.

#50-121

Sz. 35-42

Powerstep Pinnacle

Maximum Cushioning, Maximum Support!

Powerstep Pinnacle & Pinnacle Plus (with Metatarsal)

The Pinnacle Full Length Orthotic insert offers the perfect blend of foot control, flexibility and cushioning. Encapsulated design with a firm but flexible support shell, built-in arch support and heel cradle for motion control. Plush cushioning with VCT® Technology. Increases stability and comfort in casual, athletic and work shoes. The Pinnacle Plus Full Length Orthotic features a built-in metatarsal cushion to spread and cushion the metatarsal heads to help alleviate pain. (Size chart below)

#25-250 Full Length Sz. Asm-L

Powerstep Pinnacle Plus—MET

#25-275 Full Length Sz. A-I/J

Powerstep Pinnacle Maxx

This is the orthotic of choice for motion control and stability. Relieves pain that occurs during on-the-job standing, walking and high intensity sports involving running and walking. It features the Heel Secure Comfort System™, a uniquely designed heel that offers a deeper cup and an expansive micro thin platform, mildly angled for maximum support. (Size chart below)

#25-450 Full Length Sz. Asm-L

Powerstep Wide Fit

The Wide Fit Full Length orthotic insert has a semi-rigid polypropylene foot support sealed in two layers of foam—inner VCT® (Variable Cushioning Technology) foam and a soft EVA outer foam—that is calibrated for firmer arch support to resist "bottoming out" under weight. The wider profile and stable heel cup better support and better fit wide-width shoes, while the permanent heat and friction-reducing top fabric with anti-microbial qualities combats foot odor and helps keep feet drier. Fits widths 3E-6E. (Size chart below)

#25-950 Full Length Sz. Asm-L

Powerstep Original

Encapsulated design with a firm but flexible support shell, built-in arch support and heel cradle for increased stability. Moderate, dual-layer cushioning. Ultra-thin, low profile design fits in most casual, dress and athletic shoes. An ideal orthotic insert for preventing and alleviating pain associated with plantar fasciitis, metatarsal pain, heel or arch pain and discomfort, mild to moderate pronation and sore/aching feet. (Size chart for full on page 22 and 3/4 below)

#25-150 Full Length Sz. Asm-L

Powerstep SlimTech

Same design as the Original Powerstep in a 3/4 length.

#25-350 3/4 Length Sz. Asm-F

Powerstep Journey Wool

Designed specifically for use on rugged terrain. Ideal for hiking boots, ski boots and snow boots. Features a supple wool top fabric for excellent moisture-wicking and temperature regulation insulating against heat and cold. The wool also offers a layer of cushioning, combined with a double layer, shock absorbing EVA/VCT cushion casing for comfort that absorbs the impact of each step. The semi-rigid foot support is calibrated with flexibility. (Full length size chart on page 22)

#25-825 Full Length Sz. A-K

Powerstep SlenderFit

Designed with the female foot in mind! The ultra-slim, tapered profile fits in most women's fashion shoes including high heels, wedges, pumps, boots, sandals and more! Unique "S" shape shell cradles the heel and provides full arch support. Extra cushioning under the ball of the foot alleviates pressure. An ideal orthotic shoe insert for wearing fashion footwear.

Powerstep Endurance

New!

Moderate cushioning, light support. The Endurance™ Insoles offer light arch support and cushioning in a super slim, low-profile design. VCT® Variable Cushioning Technology foam with targeted Poron® cushioning at the heel and ball of foot provide protection and comfort in high-impact areas. Flexible arch support shell provides light support. Foam base and mesh coating are water resistant. Ideal for those preferring less rigid arch support or increased comfort and support while running, cycling or skiing. Low profile design fits in a variety of shoes, cleats and boots. (Full length size chart on page 22)

- Targeted Poron® cushioning at high-impact areas
- Super slim, low profile design
- Flexible arch shell for light support
- Water resistant
- Moveable from shoe to shoe with no trimming required

#25-475 Full Length Sz. A-K

Powerstep Archmolds™

These quality, heat moldable footbeds are quick and simple to personalize for a custom-like fit.

- Heat one insole at a time in a preheated household oven at 225°F until white tab turns black. (Detailed instructions are included in the package.)
- Quickly place Archmold into loosened shoe.
- Bend knees slightly and stand on Archmold inside shoe for 1 minute.

The Maximum

- Maximum cushioning for shock absorption and comfort
- 3mm polyurethane cushioning
- Ideal for use in athletic or casual shoes with removable insoles

#25-5315 Full Length Sz. A-M

The Standard

- Moderate cushioning and full support
- 1.5mm polyurethane cushioning
- Ideal for low profile or tighter fitting shoes

Powerstep Reflective Calf Sleeve

Provides added support, warmth and compression to alleviate pain related to muscle cramps, strains and shin splints. Reflective strips on back of the sleeve increase safety on early morning or night runs for more visibility. Neoprene material in an easy slip-on style fits right or left leg. Available in medium and large with measurement at widest part of calf.

#25-RCS Black Sz. M(14-15"), L(15-17")

Powerstep Patella Strap

Provides gentle compression under the patella to help alleviate discomfort and pain associated with overuse injuries such as Runner's Knee, Chondromalacia Patella (CMP), Patellofemoral Pain Syndrome (PFPS), Jumper's Knee and Patellar Tendonitis. Fits right or left knee.

#25-PS Black One size (11-18")

Powerstep Achilles Tendon Strap

A silicone gel pad that provides targeted compression to support and stabilize the Achilles tendon. Soft materials provide added warmth and compression. Helps alleviate discomfort, tenderness and pain from overuse or Achilles tendonitis. Fits right or left foot. Fits US shoe size W5-9, M8-10.

#25-ATS Black One size

Powerstep IT Knee Band

Provides targeted compression over the Iliotibial Band to help alleviate pain and discomfort on the lateral side above the knee and inflammation associated with Iliotibial Band Syndrome. Measure around leg just above the knee.

#25-ITKB Black One size (up to 19")

Three Levels of Support!

The ProThotics family of orthotics has been biomechanically designed to meet the exacting standards used by many professional footcare providers. Designed by a group of leading medical professionals, **ProThotics provide a cost-effective method for treatment of many clinical pathologies** diagnosed by podiatrists, and other footcare professionals. These biomechanically designed orthotics go beyond standard cushion insole products. They offer a cost-saving, first step treatment option. ProThotics can relieve many existing conditions and help prevent the development of future ortho/footcare problems.

- Strong arch and metatarsal rise help relieve pain in the ball of the foot, and guard against harmful overpronation.
- Polyurethane base layer provides cushioning that will never flatten out over time or lose its comfort.
- Anti-friction fabric wicks moisture away from the foot, reducing heat and shear to prevent blisters.
- Lotusof™, a full length open cell, breathable, anti-microbial, anti-odor polyurethane mid-layer keeps feet dry for all-day comfort.

ProThotics™ Pressure Relief —with Metatarsal

The Pressure Relief is identical to the Performance Sport but has a Plastazote® top layer which molds to the shape of your foot, evenly distributing pressure in a hypoallergenic, anti-microbial environment. Pressure Relief provides protection against **diabetic ulceration, and relief for arthritis**, or other foot sensitivities.

#19-23701

ProThotics™ Size Chart

	A	B	C	D	E	F
Women's	3-6.5	7-8.5	9-10.5	11-12.5	13-15	
Men's		5-6.5	7-8.5	9-10.5	11-12.5	13-15

Level I: ProThotics™ Performance Sport

Performance Sport has a metatarsal rise, as well as exceptional cushioning. Trimmable. Strong arch and metatarsal rise help relieve pain in the ball of the foot, and guard against harmful overpronation.

#19-237

Sz. A-F

Level II: ProThotics™ Motion Control

The Motion Control Sport Insole has a soft and supportive metatarsal rise, as well as a **structural stabilizer** which promotes maximum stability, prevents pronation, rolling ankles, and helps to correct postural alignment. It is the original design which combines support with cushioning, only possible with the arch stabilizer integrated with Vy-Gel where heel strike occurs.

#19-217

Sz. A-F

Level III: ProThotics™ Ultra Arch

The Ultra Arch is an orthotic insole with superior cushioning, arch support, and forefoot pressure relief. This is achieved with a **composite graphite arch support inlay** within a zero memory polyurethane base layer, plus Vy-Gel in the heel and forefoot. The Ultra Arch has a Vy-Gel injection within the heel cup resulting in a cushioned heel strike and fully supported arch.

#19-236

Sz. A-F

Total Support™ Sandals

Unlike other footwear that claims orthotic benefits, Spenco® Footwear is easy to wear. The initial soft feel and incredible comfort are unmatched. It's the combination of all these features that create "The Shape That Feels Great™" - only Spenco® Footwear with TOTAL SUPPORT® Technology has it, and it makes for the best footwear to ease the symptoms of the most common foot ailments.

Recommended For:

- Duplicating the features of the Total Support Insole in a sandal
- Increased shock absorption and advanced support for arch and heel
- After sports or training, indoor or outdoor wear, whenever sandals may be worn
- Improved motion control to reduce pronation and supination

Spenco Orthotic Arch Supports

Firm Adjustable Arch Support Insole. Helps control, stabilize and balance the foot. Heat moldable for a custom fit. SpenCore® Layer absorbs shock and reduces friction to improve overall foot comfort. Adjust the shape of the orthotic by placing in boiling water for 2 minutes and then bending to desired shape.

- Moldable Orthotic Cradle
- SpenCore® Material
- Technical Topcloth
- Silpure Antimicrobial

#7-43-042 Full Length Sz. 1-6
 #7-43-158 ¾ Length Sz. 1-6

Spenco ThinSole Orthotics

Ultra-thin, firm support insole. Helps relieve arch pain, improves gait, balance and stability. Increase wear-time daily as you adapt to a new level of support.

- Ultra-thin Moldable Orthotic Cradle
- ¾-length SpenCore® Material
- Technical Topcloth
- Silpure Antimicrobial

#7-43-240 ¾ Length Sz. 1-6

Heat Moldable Vasyli Orthotics

Vasyli orthotics are heat moldable so you can create a custom fit for your patients and customers.

Vasyli Dananberg

The Dananberg Orthotic makes treating first ray function easier. The world's first professional orthotic device with removable first ray sections has been designed with proximal and distal plugs which can be removed individually or together as necessary. In cases where maximum effect is required (Structural Hallux Limitus - SHL), both plugs can be removed. This orthotic is also **heat moldable** to personalize the rearfoot control.

#30-4100 Full Length Sz. XS-XL

Vasyli Custom Orthotics

- **Heat moldable** for customized prescription
- Inbuilt 6° rearfoot varus angle
- Inbuilt metatarsal raise

Vasyli Blue—Medium Density

Designed for the "average" patient with general orthotic needs, blue density orthotics provide excellent biomechanical control.

#30-4300 Full Length Sz. S-XXL

Vasyli Red—High Density

Designed for high performance, this orthotic provides durability and solid biomechanical control. Ideal for high activity users and overweight patients.

#30-4400 Full Length Sz. S-XXL

CS6: Compression Calf Sleeve

- Improves circulation • Eases muscle soreness • Aids recovery

A comfortable and easy-to-wear alternative to tight, binding compression stockings. Compression Zone Technology™ uses specific graduated compression to encourage efficient blood flow and oxygen return, providing relief from common conditions like chronic venous insufficiency, and edema. It also provides medical grade support for the Achilles tendon and calf muscles, relieving shin splints, cramping and Achilles tendonitis. Fits easily under normal socks and clothing.

KS7 Compression Knee Sleeve

- Relieves patella tendonitis • Eases knee pain • Reduces swelling

The KS7 Knee Compression Sleeve can help relieve knee pain by providing warmth, strength, and support to the affected area. High-quality nylon materials provide comfortable, lightweight support that will never itch, sweat or slip down leg during activity. The KS7 is able to relieve pain resulting from knee arthritis, patellar tendonitis, iliotibial band syndrome, Runner's Knee, and more.

Compressive Support Ankle Brace

The Compressive Support Ankle Brace is made with a unique 4-way stretch knitted elastic. Its anatomical shape provides comfortable soothing compression while helping aid blood flow through the ankle. The seamless design maximizes comfort and removes pressure points on the heel and back of the ankle. The soft elastic material provides support and relief from the arch of the foot to the leg. Latex free. Made in USA.

Heel Lifts

Medi-Heel Lift

Developed for the purpose of compensating for leg length discrepancies when used individually, or elevating the heel when used in tandem. When used in one shoe at a time, the lifts help to restore pelvic balance and eliminate rotation of the lumbo-sacral spine caused by unequal leg length. When used in both shoes at the same time, they can provide balanced elevation. Provides excellent shock absorption and can be stacked for a custom amount of lift. These lifts are easily cut to size with sharp scissors. Molded from a pliable, resilient, washable plastisol (not rubber) that is latex and allergy free. **Sold per single lift.**

Women's lifts are 2.25" wide and men's lifts are 2.75" wide.

Heel Lifts

Adjust-a-Lift

Effective solution for heel pain or related conditions. Constructed of sponge rubber with a leather cover. Use "as is" for 3/8" buildup or peel off individual 1/8" layers for desired thickness (OK to reattach later if needed). Can be used to balance leg-length discrepancies. Universal construction fits right or left foot. **Sold per pair.**

#12-505-L	Large	3.0 x 5.25"

Black Adjust-a-Lift Heel Lift®

The Black Adjust-a-Lift is made with three layers of 1/8" open cell foam rubber.

The Adjust-a-Lift Heel Lift® is a very high quality, versatile item that is helpful in treating a wide range of symptoms arising from the effects of leg length inequality. Low back pain, hip pain and knee pain are some of the more common conditions associated with leg length deficiencies. Adjust-a-Lift Heel Lift® has also proved effective in the treatment of some foot and ankle conditions such as plantar fasciitis, heel spurs and Achilles tendonitis. **Sold per single lift.**

Heel Cups

Tuli's Classic Heel Cups™

Tuli's double-ribbed classic heel cups provide 50% more protection than the previous model and provide relief from everyday pain of heel strike.

#18-10-010	Regular	Under 175 lbs.
#18-10-020	Large	Over 175 lbs.

Tuli's Heavy Duty Heel Cups™

The primary force of the heel strike is absorbed by the larger and higher waffle pattern while the lower and denser waffle pattern absorbs the "high pressure" and final force spike of heel strike.

#18-10-211	Small	Under 80 lbs.
#18-10-212	Regular	Under 175 lbs.
#18-10-214	Large	Over 175 lbs.

Tuli's Classic Gel Heel Cups™

TuliGel is a specially formulated polymer that is lighter, softer and more resilient than the material used in other heel cups.

#18-102-15	Regular	Under 175 lbs.
#18-102-16	Large	Over 175 lbs.

Tuli's Heavy Duty Gel Heel Cups™

Use Heavy Duty Gel Heel Cups for high impact activities.

#18-102-19	Small	Under 80 lbs.
#18-102-17	Regular	Under 175 lbs.
#18-102-18	Large	Over 175 lbs.

PQ Premium Gel Heel Cups

Dual durometer all purpose cup provides maximum shock and shear force absorption and dissipation.

#40-16-S	Small	M5-6 , W4.5-8.5
#40-16-M	Medium	M6.5-8.5, W9-12
#40-16-L	Large	M9+

Spenco Gel Heel Cups

True heel cupping stabilizes and cradles the heel for overall comfort. The anatomical cushioning system absorbs the shock through a dual density design.
